

## Emory University - Summer 2021 Co-Curricular Planning Guidelines

---

### In-Person Activities

Proposed in-person activities for summer programming should follow policy guidelines aligned with Emory's "yellow" operating condition status at this time. Such policy guidelines are subject to modification through the spring and summer months. Planning parameters for the yellow operating condition can be found [here](#). All proposed activities must be deemed practical and sustainable with regards to resource demands placed on Emory University staff, facilities, and COVID-19 protocols.

Summer co-curricular in-person activities will only be permitted for those 18 years of age or older (exemptions for admitted Emory students under 18 or participants in pre-college programming). Any co-curricular activity with minors will need to be conducted via virtual/remote delivery. Both in-person and virtual activities may be open to both Emory affiliated (faculty, staff, students) and non-Emory participants. If any co-curricular program includes non-Emory participants, they must be willing to adhere to all Emory COVID-19 protocols.

### COVID-19 Program Protocols

All co-curricular programs intending to host in-person activities this summer will be required to abide by, at this time, the following COVID-19 guidelines. These include, but are not limited to:

- Wearing a mask or face covering in all public spaces
- Maintaining appropriate physical distance and complying with gathering size limits
- Maintain confidential records in accordance with FERPA and HIPAA guidelines
- All program sponsors, on-site leaders, and participants will sign an individual agreement to follow all University guidelines, policies, and regulations concerning the COVID-19 pandemic.
- Following guidelines about self-isolation and quarantine
- Adhering to all travel and off-campus conditions and restrictions
- Following occupancy capacities in University spaces

### Onboarding and Testing

All Emory faculty, staff, and students will need to be in compliance with the onboarding process. Non-Emory participants will need to comply with current visitor policy protocols and provide proof of a negative result from an EUA-approved COVID-19 test conducted within 48 hours prior to arrival on campus. Participants will also be tested for COVID-19 during their program in accordance with university protocols, subject to receipt of a signed consent form.

Once a co-curricular program or activity receives approval through its pre-existing unit or school approval processes, the program coordinator or director will be required to submit program details including dates and rosters to [covidscreeningprogram@emory.edu](mailto:covidscreeningprogram@emory.edu). This information will be required at least ten (10) business days prior to the program start. Once submitted, Emory's COVID screening operations staff will coordinate testing based on each program's length, roster, and resource needs.

### Housing and Dining

Please follow this [link](#) which reviews anticipated policies and procedures for on-campus housing and dining.
